## INSIDER SPECIAL REPORT: PIEDMONT

**NEBBIOLO** freaks are going to be surprised how close in quality many of the top wines of Piedmont are in 2005 and 2004. It's accepted wisdom that 2004 is superior to 2005, but I have found that after tasting dozens of Barolos and Barbarescos from the two vintages, they are very close.

The 2004 vintage could have been an extraordinary year, but many growers produced too many grapes, which diluted some of the inherent quality of the vintage. Meanwhile, 2005 was also excellent, but top producers had to deal with rains during the late growing season as well as during the harvest. In both cases, it was a question of offsetting some of the diluting effects of the year through careful vineyard management and grape selection during the harvest. All the wineries in this report seemed to do just that.

Stylistically, the 2004s are a little more aromatic than the 2005s. But both years produced Nebbiolos with bright and fruity palates and polished tannins. Stick to the top names and top vineyard sites in either vintage.
